- Up to 2-Miles of Range
- Digital Spread Spectrum Technology (DSST)
- 3-Year PRO Remote Warranty
- Water Resistant/Durable Remote Casing
- Lock/Unlock Capable
- Drone LTE Module Included

Remote Fob Range The amount of range you need depends on your lifestyle. One of the main reasons why people choose to get a new remote is for an upgrade in range. We're proud to offer a variety of remotes with ranges from a couple hundred feet to up to 3-miles. Much like with 2-way vs. 1-way remotes, the amount of range you should get depends on your needs.

LCD vs. LED LED remotes use a series of lights and beeps to communicate with the user, while the LCD remotes have a screen allowing for more advanced communication. For example, the 901 remote's LCD screen animates and the remote vibrates when you send a remote start command.

2-Way vs. 1-Way 2-way remotes allow you to send commands to your vehicle and confirm when the command is successful. Some remotes will also notify you if your command has failed. On the other hand, 1-way remotes allow you to send commands, but you will not receive a confirmation when the command is received by the vehicle.

Security Alerts With your 2-way remote, you can receive alarm alerts, and even some more advanced security alerts. If you have shock sensors installed as part of your Compustar system, any 2-way LCD remote will notify you immediately.

Battery Type When you get a Compustar remote, you can choose between USB rechargeable and easily replaceable, non-rechargeable battery powered remotes.

Auxiliary Features Some of our remotes come with the ability to control Auxiliary Features, such as window roll-up/down, sliding doors, and trunk.

Waterproof vs. Water Resistance Many of our remote kits now include remotes that are IPX-7 waterproof while some are water resistant.

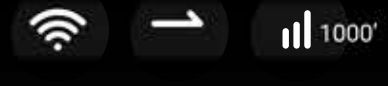

1-Way Pro LED Remotes

PRO G15 \$449

- LED Light
- Trunk Pop
- 3000' Range
- Water Resistant - 3 Year Warranty
- 1-Way Remote

1-Way Prime LED Remotes
